

Edward T. Naureckas, MD
Professor, Department of Medicine
Section of Pulmonary and Critical Care Medicine
Biological Sciences Division

Dr. Naureckas is the director of the Adult Asthma and COPD Center and the Cystic Fibrosis Center at the University of Chicago. He served as Chair of the Chicago Asthma Consortium from 1998-1999. He has published analyses of large pharmacy databases focused on asthma medication adherence. He has also been the author or co-author of numerous clinical guidelines for the care of cystic fibrosis and is a former chair of the Cystic Fibrosis Foundation's guidelines committee.

His current research focuses on large multicenter clinical trials in Asthma, Cystic Fibrosis and COPD. He is currently a co-investigator in the NIH sponsored PrecISE network as well as the American Lung Association's Airways Clinical Research Consortium. He is a former PI in the Cystic Fibrosis Foundation's Therapeutics Development Network (CF-TDN).
