In addition, special thanks to Kim Artis, Gay Chisum, Pamela Dominguez, Amanda Hochleutner, Rhonda Lay, Justina Shaw, Ellen Shepard; and the executive leadership of CAC, Marc Rosen, Amy O'Rourke, Sarah Rittner, Sharmilee Nyenhuis, and Joenell Henry-Tanner.

This project was supported by the Illinois Department of Public Health, Asthma Program, through Cooperative Agreement Number NU59EH000532-08 funded by the Centers for Disease Control and Prevention. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Centers for Disease Control and Prevention or the Department of Health and Human Services.

Introduction

Chicago Asthma Consortium (CAC) is a coalition of medical and public health professionals, business leaders, government agencies, community-based organizations, and individuals dedicated to improving the quality of life for people with asthma, through advocacy, education, and collaboration.

In Autumn 2017, CAC was awarded funding from the Illinois Department of Public Health (IDPH) to create an Asthma Resource Collection for Chicagoland, to increase asthma resource and service delivery to individuals living with asthma. Chicago Asthma Consortium determined that it was critical to better understand the asthma resources and assets currently available to Chicagoland residents with asthma, along with assets and resources that may be currently missing or unavailable.

The project objectives were to 1) engage community partners in identifying and documenting existing and missing asthma assets, 2) disseminate the Asthma Resource Collection to increase utilization and reduce duplication of effort among asthma stakeholders, and 3) assess and address priority asthma resource gaps.

The intended beneficiaries of the Asthma Resource Collection are not only patients, but also those serving them: caregivers, providers, health systems, school systems, researchers, and non-profit organizations. By informing key stakeholders about each other's services and service areas, CAC aimed to deepen the resources to which the asthma community could refer their clients, increase the utilization of the organizations' own resources, and help identify service gaps and opportunities for partnerships to fill them.

CAC developed an online survey, with input from its Community Advisory Board and Board Officers, Chicago Department of Public Health (CDPH), and IDPH. CAC distributed the survey to its network partners who each care about asthma and represent the asthma community. In addition, CAC partnered with both CDPH and IDPH who distributed the survey to their networks of asthma stakeholders. Survey respondents represented organizations in possession of asthma assets that are available to improve asthma outcomes, including:

- Public Health Organizations
- Hospital Systems
- Community Health Centers
- Community-Based Organizations
- Academic Institutions
- Foundations
- Pharmaceutical Organizations
- Managed Care Organizations

CAC conducted outreach by phone and email to encourage participation in the survey. The collection efforts resulted in eighty-one individual responses.

Select Observations and Highlights

Responses

81 individuals from 70 organizations responded to the Asthma Assets Inventory Survey. 48 individuals from 42 organizations filed complete, non-duplicative responses, resulting in a total of 58 individual resources listed. The breakdown of the resources by category, from highest to lowest, was as follows:

29%	Outreach and Education
24%	Patient and Community Education Resources
21%	Clinical Services and Treatment
7%	Other
5%	Care/Case Management
5%	Toolkits
4%	Training
3%	Disease Management
2%	Medication Assistance

Resource Needs

An important function of the Asthma Resource Collection is to determine where gaps exist in the availability of resources, for both asthma patients and those that serve them. 40% of the respondents indicated that they needed additional resources in one or more categories.

Resource needs were as follows:

24%	Educational materials including general asthma patient materials, low-literacy educational materials, materials for providers at hospitals and clinics, materials in Spanish, and spirometry education and resources.
24%	Diagnostic tools and medications including spacers, peak flow meters, masks, FeNO measurement, Advair Respiclick, and Albuterol Respiclick.
7%	Funding
2%	Connections to primary care providers
2%	Donated office space
2%	Knowledge of other resources available in the community
2%	Staff
2%	Training
2%	Volunteers

The Asthma Resource Survey sought to identify stakeholders that would be willing to collaborate to address resource gaps. 42% of respondents indicated interest in partnering with other stakeholders to create resources that do not currently exist or are not readily available to certain populations or geographies.

Impact on Health Equity

According to the Centers for Disease Control and Prevention, “health equity is achieved when every person has the opportunity to attain his or her full health potential and no one is disadvantaged from achieving this potential because of social position or other socially determined circumstances.” Health inequities are reflected in differences in length of life, quality of life, rates of disease, disability, and death, severity of disease, and access to treatment.

Given the national and local commitment to health equity and the unequal burden of asthma that exists within certain communities throughout Chicagoland, the survey inquired into resources that were designed specifically to promote health equity. 66% of the resources were reported as promoting health equity and 52% offered specific insight into the relevance of their resources within underserved communities that experience asthma disparities. Those resources were in the following categories, by the percentage of total resources (some resources promoted equity in multiple ways):

12%	Explicit focus on high-need geographical areas
12%	Reduced-fee or free services
10%	Explicit focus on high-need/underserved populations
9%	Underserved youth
5%	Multi-lingual services
3%	Training for providers for high-need populations

A listing of the reported health equity resources is included in the appendix of this document.

Next Steps

Initial IDPH Asthma Program funding allowed CAC to create a baseline assessment of the asthma resources and assets currently available in Chicagoland.

The 2017 Asthma Resource Collection should be the first step in an ongoing process to identify and leverage existing asthma resources and collaborate across organizations to meet asthma resource needs. With further funding, CAC can ensure that data remains current and is utilized to improve resource and service delivery to individuals living with asthma. CAC's specific recommendations for future work include:

- Disseminate the Asthma Resource Collection throughout the asthma community with an emphasis on communities experiencing asthma disparities.
- Update the Asthma Resource Collection annually, employing more robust outreach efforts and broader data collection methods including telephone surveys and focus groups.
- Collaborate with CDPH to map the resources collected to determine where there are geographic gaps in areas served.
- Convene the Chicagoland asthma community to prioritize and address identified resource gaps, with CAC providing support and facilitating collaboration across organizations.

Asthma Resource Collection

Care/Case Management

Care Coordination

Next Level Health Partners

<https://nextlevelhealthil.com/who-we-are/>

(844) 807-9734

3019 West Harrison, Chicago, IL 60612

Available now: Yes

Cost: No

Service area: 60623

Audience: Youth with Asthma, Adults with Asthma, Caregivers, Clinicians

How to access: Care Coordinator

Description: Less frequent asthma exacerbations

Case Management

Chicago Department of Public Health Lead Poisoning Prevention Program

https://www.cityofchicago.org/city/en/depts/cdph/supp_info/food_envirion/childhood_lead_poisoningpreventionandhealthyhomesprogram1.html

(312) 747-LEAD

2133 W Lexington St., Chicago, IL 60612

Available now: Yes

Cost: No

Service area: City of Chicago

Audience: Children 6 months to 6 years and parents

How to access: Via home visit and referral

Description: To identify and refer to asthma services that are available

Krames Educational Materials as approved by the State of Illinois Medicaid

Aetna Better Health IL Medicaid Managed Care Organization

<https://www.aetnabetterhealth.com/illinois/>

866-212-2851

333 West Wacker Drive Chicago, IL 60606

Available now: Yes

Cost: Yes, not known. Corporate purchase and approved by the State of Illinois Medicaid.

Service area: Cook County and surrounding collar counties

Audience: Youth with Asthma, Adults with Asthma

How to access: Information is mailed to the member.

Description: Awareness and education

Clinical Services and Treatment

Advocate Children's Hospital-Oak Lawn

Advocate Children's Hospital-Oak Lawn

<https://www.advocatechildrenshospital.com>

(708) 684-8000

4440 W. 95th St. Oak Lawn, IL 60453

Available now: Yes

Cost: No

Service area: Southside of Chicago and the southwest suburbs

Audience: Youth with Asthma, Caregivers, Clinicians, Healthcare Systems

How to access: Provided to inpatient, outpatient, and emergency room patients with a diagnosis of Asthma/RAD

Description: Increase education, awareness and compliance to our patients and families

University of Illinois at Chicago Hospital

<http://hospital.uillinois.edu/patients-and-visitors/mile-square-federally-qualified-health-center/locations/humboldt-park>

(312) 413-7425

3240 West Division Street, Chicago, IL 60651

Available now: Yes

Cost: No

Service area: All

Audience: Youth with Asthma, Adults with Asthma, Clinicians, Healthcare Systems, School Systems, Non-Profit Organization

How to access: (312) 413-7425

Description: Clinical services and treatment

Northwestern Medicine Asthma and COPD Center

Northwestern Medicine

<https://www.nm.org>

(312) 695-1800

676 N St Clair 14th floor, Chicago, IL 60611

Available now: Yes

Cost: Yes. Typical healthcare provider fees

Service area: Greater Chicago area

Audience: Youth with Asthma, Adults with Asthma

How to access: Make appointments through Pulmonary Division of Northwestern Medicine, (312) 695-1800

Description: Maximize the functional capacity and reduce exacerbations of patients with asthma.

Parent/Child Asthma Class

Advocate Children's Hospital-Oak Lawn

<https://www.advocatechildrenshospital.com>

(708) 684-8000

4440 W. 95th St. Oak Lawn, IL 60453

Available now: Yes

Cost: No

Service area: Southside of Chicago and the Southwest suburbs

Audience: Youth with Asthma, Caregivers

How to access: Through Advocate Healthcare's Health Advisor: (708) 684-8000

Description: A class for parents of children with asthma and those children over the age of 5.

Refractory Obstructive Disease Clinic

University of Chicago Adult Asthma and COPD Center

<http://asthma.bsd.uchicago.edu>

(773) 702-1016

5841 South Maryland MC6076, Chicago, IL 60637

Available now:

Cost: Yes, varies

Service area: 60637

Audience: Adults with Asthma, Clinicians, Healthcare Systems

How to access: (773) 702-9660

Description: The goal is to improve care for patients with asthma refractory to usual care.

Specific IgE Blood Test

Thermo Fisher Scientific

<https://www.thermofisher.com/us/en/home.html>

(866) 356-0354

4169 Commercial Ave. Portage, MI 49002

Available now: Yes

Cost: Yes. Lab-specific cost. A covered benefit of Medicaid and most private insurances.

Service area: United States

Audience: Youth with Asthma, Adults with Asthma, Caregivers, Clinicians, Healthcare Systems, Non-Profit Organization

How to access: Ordered by a health care provider

Description: This simple blood test measures Specific IgE. It identifies the level of IgE of common indoor and outdoor allergens that patients may be exposed to on a daily basis. The results lead to an individualized plan to reduce exposure to known allergic offenders to that patient.

UICOMP/Children's Hospital Pediatric Pulmonology Specialty Clinic

University of Illinois College of Medicine Peoria and OSF Children's Hospital of Illinois

<http://www.childrenshospitalofillinois.org/education/uicomp.html>

(309) 655-7171

530 NE Glen Oak Ave., Peoria, IL 61637

Available now: Yes

Cost: Contact clinic

Service area: 61614 and referral base of central Illinois

Audience: Youth with Asthma, Healthcare Systems

How to access: (309) 655-7171

Description: Clinical services and treatment

Disease Management

Advocate Asthma Patient Handbook

Advocate Good Samaritan Hospital

<https://www.advocatehealth.com/gsam/>

(630) 275-5900

3815 N Highland Ave, Downers Grove, IL 60515

Available now: Yes

Cost: Yes. \$3.00 through our in-house print shop.

Service area: 60516

Audience: Asthma Patients and Caregivers

How to access: Patients and caregivers receive the resource from their clinicians during a patient visit.

Description: Developed in our organization. Reduces hospital readmissions and emergency room visits.

Asthma Action Plan

Advocate Good Samaritan Hospital

<https://www.advocatehealth.com/gsam/>

(630) 275-5900

3815 N Highland Ave, Downers Grove, IL 60515

Available now: Yes

Cost: Yes

Service area: 60516

Audience: Adults with Asthma

How to access: Patients and caregivers receive the resource from their clinicians during a patient visit.

Description: Proper patient disease management

Medication Assistance

BREATH

Asthma & Allergy Foundation of America, St. Louis Chapter

<http://aafastl.org>

(314) 645-2422

1500 S. Big Bend, Suite 1S, St. Louis, MO 63117

Available now: Yes

Cost: No

Service area: Madison and St. Clair Counties in Illinois

Audience: Youth with Asthma

How to access: <http://aafastl.org/BREATH>

Description: Bridging Resources to Encourage Asthma Treatment and Health, or BREATH, is a comprehensive asthma and allergy management program available to eligible children/young adults who have been diagnosed with asthma and/or allergies of all types. Description: High quality nebulizers for quick and effective respiratory treatment for adults and children.

Standardized Electronic Health Record System

AllianceChicago

<http://alliancechicago.org>

(312) 274-0068

215 W. Ohio St., 4th Floor, Chicago, IL 60654

Available now: Yes

Cost: Yes. AllianceChicago has subscription services available where others on the same electronic health record may purchase clinical content for their sites.

Service area: National, in 18 states. Chicago, all neighborhoods, and nearby suburbs.

Audience: Clinicians, Healthcare Systems

How to access: (312) 274-0068

Description: AllianceChicago's Asthma Clinical Decision Support Form takes providers step-by-step through all screening, management, and treatment items in alignment with national guidelines. This standardized process allows for better adherence to guideline-concordant care by providers and ideally, better health outcomes for patients. The tool also affords the development and dissemination of detailed reporting around asthma in a national community health center population.

Appendix

Resources promoting health equity

ABCs of Asthma and Allergies

Asthma & Allergy Foundation of America, St. Louis Chapter

Resources include evidence-based education to high-need populations to increase the ability to manage their chronic disease.

Advocate Children`s Hospital-Oak Lawn

Advocate Children`s Hospital-Oak Lawn

The populations of focus include those with a high burden of asthma.

Asthma Action at Erie

Erie Family Health Center

The asthma education is offered as a free service to patients at several Erie locations throughout the city. Service is offered in both English and Spanish. Patients are seen in the clinic or at their home.

"Asthma Blues" Asthma Education Music CD and Book (SEK-1) Asthma Blues Toolkit for Summer Asthma Camps

CTK Clinical Consultants, LLC

This evidence-based program uses music, the universal language, to teach the guidelines for asthma. The benefit of using music is that young children and people with low health literacy can benefit from Asthma Blues.

Asthma Camp Sponsorships

Christopher D. Redding Youth Asthma Foundation

The resources reach underserved communities in the greater Chicagoland area with asthma management education and scholarships.

Asthma Education and College Scholarships to Student Athletes with Asthma

Christopher D. Redding Youth Asthma Foundation

Underserved communities in the greater Chicagoland area are educated regarding asthma management, on a grassroots level. Underserved youth are assisted in the betterment of their lives through attending college. Youth who attend asthma camps learn to manage their asthma in a fun-filled learning environment. Athletic personnel learn to better recognize symptoms and assist student athletes with asthma.

Asthma Van

Mobile Care Chicago

All services are offered at no cost regardless of insurance status, including prescription medications not covered by Medicaid.

Chicago Allergy Center- Asthma Care For All Ages

Chicago Allergy Center

Resources are provided in Spanish and English to provide linguistically appropriate treatment within underserved Latino communities in Chicago.

CROWD - Center for CHW Research, Outcomes and Workforce Development

Sinai Urban Health Institute

Community Health Workers are a critical in moving towards health equity, as they have a unique ability to build relationships, educate and facilitate change in the lives of individuals.

Education

WE Care Clinic

The resources prioritize a population with the highest rate of asthma in Illinois, which is also a highly vulnerable, socioeconomically depressed community

Fight Asthma Now©

Respiratory Health Association

Fight Asthma Now© curriculum meets the diverse needs of students and their communities by addressing contextual barriers to effective asthma management. The program includes culturally appropriate visual, auditory and experiential learning through diagrams and photographs, demonstrations, group discussion and individual reflection.

Living Well With Asthma

CHEST Foundation

The resource is available to everyone for free online so that those who cannot afford to get care from a respiratory therapist or pulmonologist can still read and understand ways to manage their condition.

Loyola Pediatric Mobile Health Unit

Loyola Pediatric Mobile Health Unit

Promotes access to care within underserved communities.

Metropolitan Tenants Organization

Metropolitan Tenants Organization

Educational resources and programs that are available at no cost to the individual.

Mobile CARE Chicago

Mobile CARE Chicago

We provide care to patients that do not have access to specialists in their neighborhoods.

Parent/Child Asthma Class

Advocate Children`s Hospital-Oak Lawn

Asthma classes are offered free of charge.

Refractory Obstructive Disease Clinic

University of Chicago Adult Asthma and COPD Center

The Clinic provides access to quality asthma care for individuals on the South Side of Chicago.

RESCUE

Asthma & Allergy Foundation of America, St. Louis Chapter

Asthma equipment is provided to high-need schools to manage asthma exacerbations.

Self-Management Education, Asthma Action Plans, other educational resources

McLean County Health Department

Resources prioritize areas with higher asthma rates.

Standardized Electronic Health Record System

AllianceChicago

Community Health Centers are comprised of patients from the most vulnerable of populations.

Currently, the AllianceChicago Data Warehouse includes 2.1 million individual patient lives across the country. Our robust data platform allows us to pull reports to detail where disparities exist and address them through research/quality improvement initiatives.
